

Dear Surprise Valley Homeowner,

Pressurized Irrigation System

Surprise Valley's Pressurized Irrigation System provides non-potable water for irrigation during the irrigation season, which runs April through Mid-October of each year. The system provides irrigation water for use by Surprise Valley homeowners every other day for two hours. Irrigation will take place at night in common areas and early morning for homeowners to minimize evaporation and increase the efficiency of water application.

To maintain pressure for all homeowners, everybody *must* water during their assigned time and no other. Each homeowner is assigned to water either ODD or EVEN days of the calendar beginning from the first irrigation day.

Additionally, each homeowner is assigned a two-hour time slot on their designated day. Assigned Watering times run between 2:00am and 10:00am. Depending upon your designated day, set your irrigation days to run ODD or EVEN during your designated time slot. The irrigation assignment does not change from year to year.

If you have any questions, please call or text the neighborhood manager at 208-368-0058 or email manager@surprisevalleyhoa.com.

Thank you for your cooperation.

Surprise Valley Homeowners Association, Inc.
